ALL STEEL TRUCK & BUS RADIAL

Zhongce Rubber Group Co., Ltd (ZC RUBBER) is a global tyre company based in Hangzhou, China and was founded in 1958. Over our more than 60 years of history, we experienced continuous growth in quality and reputation to become the Top 10 tyre manufacturer worldwide today.

Our engineers with our international R&D team focus on constant technological development and innovation spending millions of US dollars in research and development each year and upgrading our production and testing facilities. The ET Industrial Brain in the production process promises our smart production and guarantee tires with high quality, safety, and value with maximum efficiency.

- A Company Established in Year 1958
- No. 1 Tyre Manufacturer in China
- No. 8 of Top 75 Global Tyre Manufacturers in Year 2022
- Sale Revenue Reached USD4.5 Billion in Year 2021

We have formed an extensive global service network of about 1,200 distributors with 250,000 sales locations in 160 countries. Our subsidiaries in Thailand, Germany, Brazil, and the United States serve customers without any difference in time and language. We are dedicated to better support our suppliers, distributors, and customers through a one-stop service.

Safe and Value are always the key of our company. We take pride in the superior quality of our tyre products and the first-rate services. We are still endeavoring to become one of the most respected tyre manufacturers globally and craft a better future with all partners and friends.

US DOT Certification

European E-MARK Certification

SNI Certification of Indonesia

BIS Certification of India

INMETRO Certification of Brazil

Pre-Strain Contour Theory (PSCT)

Minimized tyre profile deformation

After more than 20 years of painstaking research, ZC Rubber TBR Research Center has finally successfully developed the Pre-strain Contour theory (PSCT) and four technologies derived from this theory with independent

intellectual property rights. In 2020, the newly launched ZC Rubber premium truck and bus tyres based on the theories and technologies have been recognized by the market.

- Tyre Simulation of Pre-stressing Force through FEA (Finite Elements Analysis)
- Simulation Iteration based on pre-set tyre profile
- Minimized tyre profile deformation when inflated

Pre-strain Contour Theory is a new truck and bus tyre design theory developed by ZC Rubber. We conducted the simulation of real tyre performance under different scenarios and conditions of various commercial vehicle

models. Based on the new theory and core technologies, the tyre can achieve minimized profile deformation and heat generation when inflated and loaded, which greatly improves its tyre life and overall performance.

BTCT

Belt Tension Control Technology (BTCT) - Enhanced tyre life and durability

- Reduced shear force among steel belts
- Tension improved at the end of belts but reduced at the center
- Reduced deformation at the end of belts at high speed

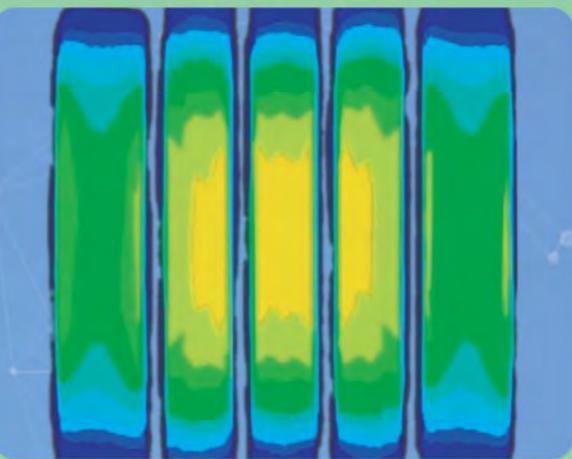

BTCT means Belt Tension Control Technology. Based on PSCT, the shear force among steel belts is greatly reduced. It improves the tension at the end of belts but reduces the tension at the center, thus ensuring the minimized tyre deformation at high speed. This features the crown with low heat generation and high strength, bringing a 20% improvement in durability and longer tyre life.

PDOT

Pressure Distribution Optimization Technology (PDOT) - Longer mileage and higher fuel economy

- Optimized Tyre Footprint and Better Contact Pressure Distribution
- Rectangular Footprint Shape for Even Pressure Distribution
- Reduced Tyre Slipping in Cornering
- Improved Tyre Life and Fuel Economy

The pressure distribution of the tyre footprint affects fuel consumption and treadwear. PDOT is used to optimize the tyre footprint and improve the contact pressure distribution. In a straight-line driving, the footprint maintains a rectangular shape for even pressure distributions; when cornering, it reduces slipping between the tyre and the ground. This improves your tyre life and fuel economy.

GSCT

Groove Strain-stress Control Technology (GSCT) - Less occurrence of groove cracking in driving

- Controllable Groove Pattern Shape When Inflated
- Uniform Distribution of Pattern Groove Bottom Stress for Lower Heat Generation
- Less Occurrence of Groove Cracking in Driving

Groove Strain-stress Control Technology can control the groove width change when the tyre is inflated. This would reduce stress concentration in pattern groove bottom, thus reducing heat generation. It minimizes the occurrence of groove cracking and prolongs tyre life.

SSHT

Shoulder Stiffness Hold Technology (SSHT) - Less uneven wear

- Less Uneven Wear of Tyre Better Tyre Inflation Profile through PSCT
- Reinforced Tyre Sidewall
- Optimized Tyre Footprint, Improved Contact Pressure Distribution and Reduced Heat Generation of Sidewall Deformation
- Less Uneven Wear of Tyre

Shoulder Stiffness Hold Technology brings the tyre inflation profile closer to the design profile. It greatly strengthens the tyre sidewall. Meanwhile, it optimizes tyre footprints, improves contact pressure distributions, and reduces the heat generated by sidewall deformation. This technology cuts the chances of sidewall bubbles and solves the problem of tyre uneven wear.

APPLICATION AND KEY FEATURE LEGEND

- Long distance journey with constant speed, less braking and accelerating
- Less fuel consumption and comfortable ride
- High mileage performance

- Shorter journey with frequent braking, accelerating and turning
- Improved road grip with maximum mileage
- Exceptional tough type

- Used both on and off road
- Heavy loads and outstanding durability
- Special protection against the damage caused by the road condition

- Frequent speed changes and turning
- Resistance to curb impact
- Excellent road grip and durable high mileage

- Contribute to safety and operating in winter conditions
- Outstanding grip performance on ice and snow road surface
- Stable handling during braking and turning

Long Haul

All Steel Truck & Bus Radial Tyres

中策橡胶

- Five ribs with four wide, straight grooves for precise handling and outstanding traction
- Decoupling tread design suitable for long-distance travel
- Applicable for steer and free-rolling wheel position

● Made in China ○ Made in Thailand

- Ultra deep tread with robust tread blocks features excellent wet traction and longer tyre life
- Drive axle applicable providing lateral stability and multiple retreads
- Latest carcass technology guarantees superior footprint and enhances damage resistance

● Made in China ○ Made in Thailand

- Designed to provide exceptional Performance and Life in Linehaul Drive applications
- Large block design helps enhance handling and traction on all season highway conditions
- Tread bars maintain an even footprint and help prevent tyre squirm
- Cool running compound to promote longer life, Great CPK (Cost Per Kilometer) performer

● Made in China

- Applicable for drive wheel position on long-distance and regional transportation
- Solid close shoulder design with special tread compound for enhanced traction
- Computer designed carcass reduces pressure on road and promotes even wear
- Improved casing structure provides remarkable footprint which guarantees longer tread life

● Made in China ● Made in Thailand

- Wide and deep tread helps to promote even wear and long tread life resulting in low cost per mile
- Solid close shoulder ribs help to improve even wear
- Three deep grooves evacuate water efficiently for traction
- Strong casing resists cuts and punctures for enhanced toughness and long casing life

●: Recommendable

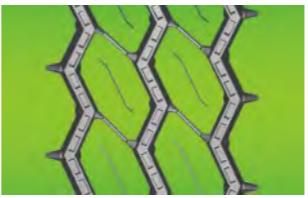

Brand new flagship tyre for regional application with Less uneven wear and enhanced durability based on PSCT
GSCT technology minimizes the occurrence of groove cracking and prolongs tyre life

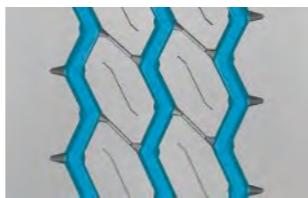

Tubeless

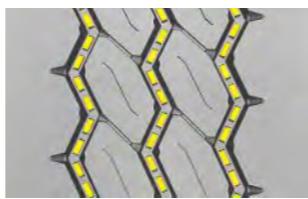

Tube

Wider and deeper tread helps provide long tread life on various road surface

3 zigzag grooves and multi-angular sipes Improve traction and braking performance

Stone ejector in the groove protect belt from stone drilling

Tube Tubeless

- Multiple gripping edges slice through water and road films for a solid grip
- Four wide continuous rib design help resist tread squirm and heel-and-tow wear for exceptionally long tread life
- Three circumferential grooves help deliver all-season traction on wet or dry road
- Closed shoulder design helps promote even wear throughout the tyre life

All Steel Truck & Bus Radial Tyres

中策橡胶

- 3 circumferential grooves ensures good directional stability, even wear and smooth ride
- Heavy siping provides good braking stability and high lateral traction on wet and dry surface
- Improved tread compound helps resist tears and ensure good mileage in on and off road use
- Sidewall reinforcing ribs protects against impacts and scuffing

● : Recommendable

AZ676

- Wide and deep tread enhance driving stability and mileage on all kinds of roads
- Special tread compound and carcass help to guarantee long tyre life and better retreadability
- Zig-zag main grooves provide superb traction level

● : Recommendable

All Steel Truck & Bus Radial Tyres

中策橡胶

- Non-directional tread design for easy operating
- Open lug design helps provide traction in wet or snowy conditions

● : Recommendable

CM987/CM987E

- Traction block tread design for high drive wheel efficiency in all seasons
- Aggressive blading helps provide road-gripping traction
- Open shoulder produces powerful traction on wet and dry roads

● : Recommendable

● : Recommendable ○ : Available

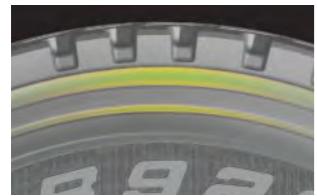

Upgraded classic tyre for ON&OFF application with Longer mileage and Enhanced durability based on PSCT
BTCT technology reduce deformation at the end of belt at high speed

3 circumferential grooves ensures good directional stability, even wear and smooth ride

Heavy siping provides good braking stability and high lateral traction on wet and dry surface

Sidewall reinforcing ribs protects against impacts and scuffing

● Made in China ● Made in Thailand

- 3 circumferential grooves ensures good directional stability, even wear and smooth ride
- Heavy siping provides good braking stability and high lateral traction on wet and dry surface
- Improved tread compound helps resist tears and ensure good mileage in on and off road use
- Sidewall reinforcing ribs protects against impacts and scuffing

● : Recommendable ○ : Available

- Aggressive multi-service, all position tread pattern promises excellent traction in ON/OFF road service
- Outstanding self-cleaning tread design ensures long-life service in ON/OFF road conditions
- Robust tread blocks and rugged casing allows for heavy loads and resist casing penetration and damage

● : Recommendable ○ : Available

AT557

- Wide, deep tread helps provide long tread life in regional conditions
- Zig-zag ribs ensure even wear and grip on wet, dry and snowy roads

● Made in China ○ Made in Thailand

- Increased tread width and depth promise longer mileage
- Stone rejection design reduces stone retention and maximize the casing durability
- Zig-zag rib groove ensure super traction on wet, dry and snow roads
- Scuff protection on sidewalls enhances resistance to lateral impacts and abrasion

● Made in China

- Aggressive block design provides outstanding traction on rough roads
- Wide tread and special tread compounds resist chipping, chunking, and tearing
- Durable tyre casing for heavy loads
- Applicable for low speed use. Maximum speed shall be limited to 70 km/h in winter and 50 km/h in summer

Brand new flagship tyre for on&off application with Less sidewall deformation and enhanced tyre life based on PSCT
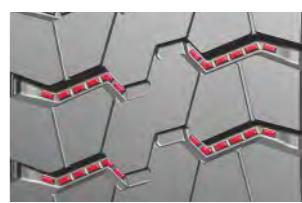

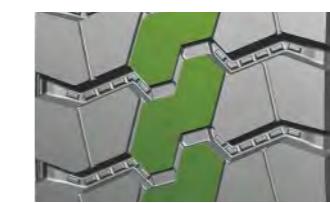

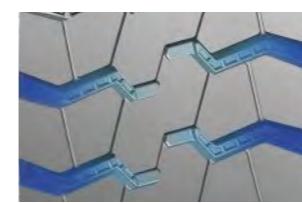

Cutting resistance compound helps resist chipping, chunking and tearing for a better mileage

NEW

Dual tie bars center block ensure the tyre stability in all driving conditions

Stone rejection design reduces stone retention and maximize casing durability

Optimized sipes distribution and open shoulder design improve the heat resistance performance

Brand new flagship tyre for on&off application with Less sidewall deformation and enhanced tyre life based on PSCT

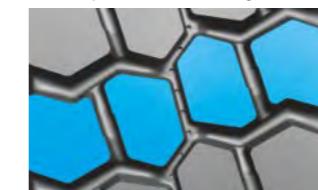

Cutting resistance compound helps resist chipping, chunking and tearing for a better mileage

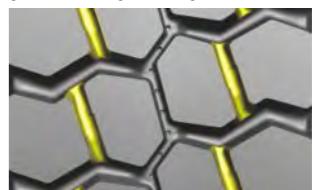

Width and high rubber volume tread design ensure a remarkable tyre life

Polygonal block pattern provides excellent traction performance on rough roads

Integrated tie bars prevents stone drilling and guarantee longer mileage

● Made in China ● Made in Thailand

- Aggressive lug design with large blocks at tread center provides excellent traction and braking on rough roads with mud or gravel and is self-cleaning for ease of maintenance
- Applicable in mining, logging, construction or rock and quarry operations with some very short on high-way use possible
- Special tread compounds resist chipping and chunking in rugged off-road conditions

● : Recommendable
○ : Available

CB972/CB972E

- Aggressive lug design with large block at tread center designed for mining, rock and quarry operations
- Wide tread and special tread compounds resist chipping, chunking, and tearing
- Stone rejector platform prevents trapped stones from puncturing deeper and piercing belt

● : Recommendable

All Steel Truck & Bus Radial Tyres

中策橡胶

- Four rib tread pattern provides uniform wear and excellent traction on wet and dry road.
- Deep and wide tread enhances mileage for exceptionally long tyre life
- Reinforced shoulder and steel sidewall help deliver long casing life and retreadability
- Sidewall protector ribs help resist sidewall damage from turning, backing and braking when used in urban neighborhoods.
- Cool-running compound delivers low rolling resistance meaning more fuel efficiency

● : Recommendable

CR906/CR906II

- Deep tread depth and optimised rib width ensures outstanding mileage performance
- Zig-zag groove provides excellent traction and braking
- 3D siping helps improved traction and even wear.
- Excellent sidewall protection minimizes scuff damage from turning and braking

● Made in China

WINTER

- Contribute to safety and operating in winter conditions
- Outstanding grip performance on ice and snow road surface
- Stable handling during braking and turning

STEER/TRAILER

DRIVE

ND783

Winter

All Steel Truck & Bus Radial Tyres

中策橡胶

- Wide and deep circumferential grooves enhances removal of snow and ice
- Specific tread compound keep rubber softness in low temperature with good performance
- Wide tread with advanced block and sipe design provides extra traction for snow and ice road conditions

● : Recommendable

● Made in Thailand

- Strong biting edges guarantee excellent traction on dry and slippery road surface, especially in winter
- Specific tread compound offer good mileage without sacrificing wet traction
- Wide open shoulder deliver additional traction without compromising tread life

● Made in Thailand

- Wide tread provide stability while improving handling on wet and snowy road
- Extra deep tread depth provide long original tread life
- Open shoulder grooves deliver additional traction without compromising tread life
- 3D siping provide excellent traction and braking
